## SPINDLE SPEEDER QUESTIONNAIRE

\*-required

|                |      |        |  |
|----------------|------|--------|--|
| Company Name*: |      |        |  |
| Address:       |      |        |  |
| Contact*:      |      |        |  |
| Phone:         | Fax: | Email: |  |

### Specifications to the Machine:

|                             |                  |                               |            |
|-----------------------------|------------------|-------------------------------|------------|
| Machine Make:               | Machine Model:   |                               | Year:      |
| Spindle Taper*:             |                  |                               |            |
| Max Spindle Speed:          | RPM              | Max Ø Adjacent Pockets Empty: |            |
| Max Tool Ø:                 | Max Tool Length: | Max Tool Weight:              |            |
| Positioning Block Supplier: | (Check One)      | Lyndex-Nikken                 | E/U Other: |
| Machine Spindle Drawing*:   | (Check One)      | Yes (email to Lyndex-Nikken)  | No         |

### Specifications to the Application:

|                                     |                              |         |           |
|-------------------------------------|------------------------------|---------|-----------|
| Application*:                       | Drilling                     | Milling | Engraving |
| Max Shank Ø*:                       |                              |         |           |
| Specify Material*:                  |                              |         |           |
| Cutting Tool Data*:                 |                              |         |           |
| Work Piece Drawing or Exploded View | Yes (email to Lyndex-Nikken) | No      |           |

### Specifications to the Spindle Speeder:

|                                                              |             |               |
|--------------------------------------------------------------|-------------|---------------|
| Dimensions (special requirements- see drawing on other side) |             |               |
| Required Spindle Speed:                                      | RPM         |               |
| Running Time at Stated RPM Per Cycle:                        |             |               |
| Time Between Usage:                                          |             |               |
| ATC or Hand Load:                                            | (check one) | ATC Hand Load |
